

We are a Singapore public-listed company specializing in the design, development, manufacturing and distribution of automated machines/equipment for the semiconductor and solar industries.

SUPPLY CHAIN DEVELOPMENT MANAGER

Main Responsibilities

The incumbent will be responsible to source, qualify and develop a reliable vendor base (existing and new) to support the businesses of the Group here in Singapore and in China.

Integral to his responsibilities is to start-up the supply chain in China for our low-volume high mix capital equipment production.

Partnership and Performance of vendors is key in the areas of quality, leadtime, price, capability and scalability. The incumbent will therefore take the lead in quarterly supplier performance audits and to ensure the availability of materials/parts to fulfill customers' orders and deadlines; whilst improving product margins for business competitiveness.

Pre-requisites

1. **Diploma / Degree in an Engineering** discipline with a **SCM background**
2. Strong network of suppliers within the region especially in China for both fabrication and standard OEM parts
3. Familiar with shipping documentation, customs and other regulatory requirements operating in the region
4. Had experience working in a high-mix low volume manufacturing environment
5. Strong appreciation of material costing (both fabrication and standard parts)
6. Able to provide and process up-to-date local market intelligence on supply chain issues for executive decision-making
7. Effectively bilingual in English/Chinese to be able to interact with our Chinese counterparts
8. Able to travel within the region (especially China) at short notice

Salary between \$4.5k to \$5.5k
